On behalf of CMS management and employees, I am proud to announce that we begin the new year in our new state-of-the-art corporate headquarters in Richmond Hill, ON. Though not a big move on the map - we're about 10 minutes up the road from the old Markham location - it represents another significant milestone in the evolution of our company.

Nearly twenty years ago, John, Paul, Steve and I set out to do more than just develop world-class ERP solutions. Along the way, we've also strived to provide our customers with the assurance of financial stability and management continuity, qualities critical to businesses that depend so heavily on the long-term integrity of our software and our support. Those same qualities have also enabled us to hire and retain dedicated professionals so vital to sustaining our growth.

CMS continues to thrive, confident and steady amidst the turmoil in the ERP industry over the past few years. The Richmond Hill headquarters stands as a symbol of twenty-year-old promises fulfilled, a confirmation of our vitality in 2005, and a launching pad to a dynamic future.

Please consider this your invitation to come by for a tour of our new offices.

Sincerely,

*Rudy*
