

A Runaway Train Is  
Barreling Down The Track.

It Might Be Coming At You.

Are You Ready?

### **Turmoil...**

It's the new reality  
for companies caught unaware  
as their ERP providers are bought  
and sold, merged or liquidated.

If it happens to your ERP provider,  
can you avert potential catastrophe?

### **What will you do...**

If your ERP provider  
increases their support charges  
dramatically next year?

If they stop supporting  
your solution next year?

If they're out of  
business next year?

# CMSsoftware

WHO WE ARE *is*  
WHO WE'VE BEEN *for*  
20 Years

How Many ERP Providers Can Say That?

**Together in 1986**, four partners launched CMS to provide manufacturers and distributors with world-class ERP function.

They knew then that CMS' success depended on their ability to provide customers with an evolving solution that would meet their changing needs, and on assuring them of CMS' financial stability and management continuity.

These twin considerations are critical to businesses that depend so heavily on the enduring integrity of their ERP software and the company that stands behind it.

**Together today**, these same four partners believe integrity is the reason CMS Software, Inc. continues to thrive - confident and steady - amid the turmoil in the ERP industry.
